

RIFDHY RM

Cyber Security Team Lead | Threat Operations & Detection Engineering | Vulnerability & Exposure Validation

Sri Lanka (Open to Relocation) | rifdhyrm@gmail.com | +94 76 166 8914 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cyber Security Team Lead with 4+ years leading 24/7 SOC and threat operations, currently overseeing a team that triages 500+ daily alerts across Microsoft Sentinel and Stellar Cyber XDR, with zero missed critical incidents and a 35% reduction in false positives through detection rule tuning. Hands on experience validating CVE/CVSS scored vulnerabilities, mapping adversary behaviour to MITRE ATT&CK, and assessing internet facing exposure using Shodan, Censys, LeakIX, and Nuclei across live client engagements. Manages enterprise vulnerability management via Rapid7 Nexpose, builds Python/Bash automation for alert enrichment and IOC processing, and works cross functionally with engineering and analyst teams to improve detection logic and reduce cyber risk.

CORE SKILLS & KEYWORDS

Team Leadership & Operations: SOC/Threat Operations Team Lead, Analyst Scheduling, Escalation Workflows, SLA Management, 24/7 Shift Coordination, Mentoring & Knowledge Base Authoring

Vulnerability & Exposure Validation: CVE/CVSS Scoring & Analysis, Vulnerability Mechanics, Rapid7 Nexpose, HostedScan, Remediation Tracking & Validation, Attack Surface Mapping

Internet Facing Recon & Threat Verification: Shodan, Censys, LeakIX, Nuclei, OSINT, Exposure Discovery, Proof- of- Concept Validation

SIEM & Monitoring: Microsoft Sentinel, Stellar Cyber Open XDR, Splunk, KQL, Sigma, Log Correlation & Analysis

Frameworks & Standards: MITRE ATT&CK, Cyber Kill Chain, OWASP Top 10, NIST aligned Incident Response

Networking & Adversary Behaviour: TCP/IP, FortiGate & Palo Alto Firewalls, IDS/IPS, VPN Monitoring, Attack Pattern & Threat Actor Behaviour Analysis

Penetration Testing: Burp Suite (Pro), Nmap, Metasploit, SQLi, XSS, IDOR, Auth Bypass

Cloud Security: AWS (IAM, GuardDuty, CloudTrail, S3), Azure (Sentinel, Entra ID)

Automation & Scripting: Python, Bash, PowerShell alert enrichment, IOC processing, detection automation

Tools: VirusTotal, ANY.RUN, Wireshark, tcpdump, Sysinternals, Jira, Desk365

PROFESSIONAL EXPERIENCE

Cyber Security Team Lead - Halexo (Pvt) Ltd

May 2023 – Present

- Lead a team within 24/7 security/threat operations scheduling, escalation workflows, SLA adherence, and incident coordination across rotating shifts.
- Own triage of 500+ daily alerts across Microsoft Sentinel and Stellar Cyber Open XDR, correlating events and applying MITRE ATT&CK and the Cyber Kill Chain to classify adversary behaviour and escalate incidents, maintaining zero missed critical incidents.
- Manage vulnerability and exposure validation across client environments using Rapid7 Nexpose assessing CVE/CVSS severity, prioritising remediation, and validating fixes against live risk.
- Perform internet facing exposure assessments and threat verification using Shodan, Censys, LeakIX, and Nuclei to identify exposed assets, misconfigurations, and exploitable services.
- Reduced false positive rates by 35% by developing and tuning SIEM detection rules and correlation logic, working closely with engineering to improve detection processes.
- Built Python/Bash automation for alert enrichment and IOC processing to improve analyst throughput and cyber risk-reduction workflows.
- Mentor junior analysts, review investigations for quality and accuracy, and author internal knowledge base articles on threat detection and vulnerability handling.

Penetration Tester (Freelance, Part- Time) - Remote

Jan 2023 – Present

- 20+ engagements across 6 countries (Australia, US, UK, Canada, India, Sri Lanka) web, API, and cloud penetration testing for international clients.
- Used Shodan, Censys, LeakIX, and Nuclei for reconnaissance, attack surface mapping, and automated vulnerability/exposure scanning ahead of manual validation.

- Reported 85+ vulnerabilities (40% critical/high), including SQL Injection, XSS, IDOR, authentication weaknesses, and business logic flaws mapped to OWASP Top 10, each scored with CVSS and validated through controlled exploitation.
- Delivered CVSS scored remediation reports with risk prioritisation; conducted AWS security assessments covering IAM, S3 permissions, and cloud posture.
- Produced reproducible proof- of- concept evidence and remediation guidance for client engineering and security teams.

IT Engineer - AB Mauri Lanka (Pvt) Ltd

Nov 2021 – Dec 2022

- Supported enterprise IT infrastructure and network operations across Windows and Linux systems; assisted with security monitoring, log analysis, and incident handling.
- Maintained secure onboarding/access management and collaborated with security teams on firewall configuration and infrastructure protection.
- Resolved 50+ IT support tickets per week via Jira, handling hardware, network, and access issues with a high first contact resolution rate.
- Managed backup, recovery, and disaster recovery testing for critical business systems, achieving a 90% restore success rate while meeting RTO/RPO targets.

EDUCATION

BSc (Hons) in Network Technology & Cyber Security

Lincoln University College, Malaysia - Completed 2024. Network architecture & security, offensive/defensive fundamentals, digital forensics, secure systems design, cryptography, applied research.

CERTIFICATIONS

- EC- Council Certified Ethical Hacker (CEH)
- Microsoft Security Operations Analyst Associate (SC- 200)
- Stellar Cyber SOC Analyst Associate
- INE Security eJPT – eLearnSecurity Junior Penetration Tester
- Certified Web Application Penetration Tester (CWAP)
- TCM Security - Practical Web App Security (PWAS)

HOMELAB & PERSONAL PROJECTS

- [AWS Security Monitoring Home Lab \(AWS Free Tier\)](#) - simulated real world SOC monitoring, threat detection, incident response, and cloud hardening across core AWS services.
- [Azure Security Monitoring Lab, SC- 200 Aligned \(Azure Free Tier\)](#) - Microsoft Sentinel SIEM/threat detection lab simulating enterprise SOC operations.
- [Splunk SOC Lab](#) - SIEM operations, detection engineering, and incident investigation workflows.
- [Bounty Engine Script \(BountyBrain\)](#) - AI- powered bug bounty reconnaissance and vulnerability analysis tool automating asset discovery, OSINT, web/API analysis, vulnerability tracking, and report generation.
- [Cyrexio Scanner v7](#) - AI powered assessment framework orchestrating 14 tools (including Nuclei) across 7 scan phases with Burp Suite Pro REST API integration, for authorized pentesting and bug bounty research.
